Job Path

Duration
5 d +
c. 3 mos.

Join our Job Path training!

Job Path starts with a **5 day** long job search training carried out in groups, during which you will gain confidence in your job search. The topics to be addressed include the up-to-date knowledge and skills needed in actual job search, which will be covered in an encouraging and practical way. During the training you will do concrete exercises both individually and in groups to support your own job search. Possible exercises include describing and marketing your own skills to a new employer, evaluating different employment options, preparing for job interviews or planning novel employment alternatives.

During Job Path training you will draw up your own feasible employment plan. After taking part in the training, we will help you carry out your plan. Depending on your personal situation, you will meet our career and employment experts one-to-one, participate in other group events or online webinars, for instance.

We will support you in realising your plan until your goals are met, or for three months at most.

Together, we will succeed. Welcome!

Our experts have skills, experience and knowledge regarding employment and education opportunities

We are recruitment experts and specialists in effective job search

We offer genuine support that takes into account your goals and wishes regarding a new job
